

Riley Holliday Furniture produces beautiful value oriented TV stands, consoles, and A/V entertainment. Jim Riley and Jill Holliday founded the company with two goals in mind: the best price/quality relationship in the audio video furniture business and rapid shipping of all of their furniture products. Today, they have a large warehouse facility in Ontario CA and easily fulfill these goals by delighting their clients with both value/price and a rapid shipping response.

Riley Holliday Furniture has designed their furniture to save as much as 60% on shipping and reduce the physical storage space as well. These clever credenzas assemble in minutes - almost without tools - they have a few simple steps which involve tools - like fixing the handles and securing the top. The rest is really fast and tool-less assembly.

Everyone's first reaction upon seeing a credenza set up is a giant smile of appreciation. Most comment and say, "Why didn't I think of that?" When they consider the other benefits Riley Holliday brings to their business, they start considering how many models they can bring to displays.

What makes these so exciting? Call your Omega Sales representative and set an appointment to see these amazing products.
